

I-BORO®

Mobile service tool to reduce costs and minimize downtime

Your systems supplier for all pellet shapes

I-BORO® – instant expert service at your fingertips

I-BORO® is an innovative mobile service tool based on a portable mini-PC and a safety helmet outfitted with a zoom camera, control display screen and headset. The sophisticated software enables a direct internet linkage with Automatik Plastics Machinery's service specialists. Using I-BORO®, your on-site personnel can explain problems while actually showing them in real-time operation. Through efficient diagnostics and a joint approach to problem solving, Automatik Plastics Machinery can deliver expert service instantly, dramatically reducing downtime.

Real-time transmission of video, sound and all relevant service data ensures the clear and complete communication with the Rieter service center. This state-of-the-art tool enables even the most complex challenges to be rapidly solved, with a significant savings in time and money.

TECHNOLOGY:

- Mini-PC with Intel Pentium M 1.1 GHz processor, 512 MB SDRAM, Windows XP Professional
- 10x optical zoom / 4x digital zoom camera with 470 TVL (NTSC) and 460 TVL (PAL) horizontal resolution
- Internet connection: standard WLAN 802.11 a/b/g, HSDPA/UMTS via plug-in card
- Interfaces: 3x USB 2.0, 2x IEEE 1394 (FireWire), PCMCIA/CF
- Video: MMI
- Card sockets: PCMCIA, PCMCIA/CF

YOUR BENEFITS:

- Instant virtual on-site presence for a wide range of service and support needs
- Rapid and efficient troubleshooting
- Ability to instantly link other Rieter experts into the conference
- Significant cost savings through reduction in downtime and elimination of travel by service specialists
- Global data connection via WLAN, HSDPA, UMTS and satellite
- Real-time transmission with excellent audio-visual quality

I-BORO® – the mobile service tool with portable mini-PC, safety helmet with zoom camera, control display screen and headset
