

EXTRUSION PACK² OPEN

The open control system for your extrusion line

... automation at its best

Increase your productivity!

RESOTEC prepares your extrusion line for future needs. The modular performance concept is the turnkey for retrofitting your already existing extrusion lines.

Your requirements determine the type and range of the services, and we ensure the realization is carried out, expertly and on time.

Take advantage of the RESOTEC EXTRUSION PACK² for the easy and reliable operation and control of your existing extrusion lines. Our know-how in plastic applications has been proven over many years, day by day and throughout the world.

RESOTEC provides a modular performance concept for your individual solution

- turnkey
- on-time
- at a fixed price

Ensure quality

With our help you will be able to

- meet the requirements of DIN EN 9001: 2000,
- reduce your reject and complaints quota, and thereby
- increase your customer satisfaction.

Save time

You will benefit from

- less fitting and start-up times
- reduced stoppage times
- the minimum diagnosis requirement for maintenance

Reduce costs

Our products will reduce

- personnel costs due to time savings
- material costs due to reduced reject and complaints quotas

offering you the quickest and best route to a successful leap forward in technology.

Create transparency

Maintain perfect control by

- automatically documenting performance and quality
- implementing confirmable working processes

Complete EXTRUSION PACK² OPEN EP-L system with rotary impulse and key module options

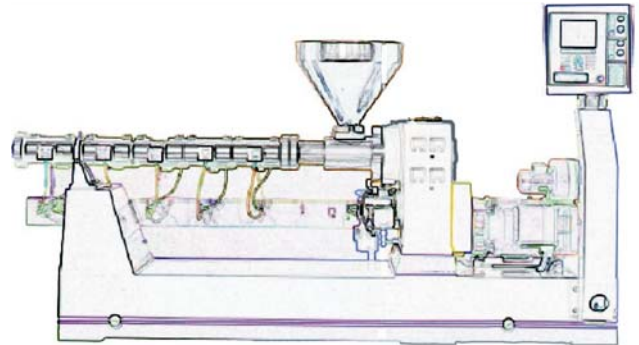

EXTRUSION PACK² Open One control system, flexible and successful

Flexibility creates new dimensions

Only those who are able to utilise effectively the advantages of new dimensions for themselves and their customers can survive in the tough competition of today.

EXTRUSION PACK² OPEN...

RESOTEC has already been thinking of tomorrow in order to provide you, both now and in the future, with a solution with which you can maintain your market position with flexibility and success.
