

This seminar is organized by Autoclave, your supplier of Systag, Büchi and Huber apparatus in the Benelux.

Systag System Technik AG

Developer and producer of complete innovative solutions for automation in your lab and R&D.

One modular concept for the complete development of your chemical process.

www.systag.ch

Huber Kältemaschinenbau GmbH

Innovative specialist in the field of thermoregulation in lab, pilot plant and production.

Huber develops plug and play systems (closed and open systems).

www.huber-online.de

Büchi Glas Uster AG

Reknown specialist in (pressure) reactors, pilot plants and process apparatus.

www.buchiglas.com

Invitation Seminar
5 or 6 October 2011

Lab automation

Maximum output with minimum input

Get more results with less equipment!

This is possible with Systag's modular lab automation and the extremely efficient Huber thermostats!

The modular construction of the Systag systems is flexible and can be altered immediately for every experiment. The use of smart cables facilitates conversion to a simple level!

Are you keen to see and experience this yourself?
Just join our seminar!

Main features:

- high precision
- reproducibility
- modular systems
- modular recipe programming
- exchangeable accessories
- custom made configuration à la minute with smart cables
- SOP's

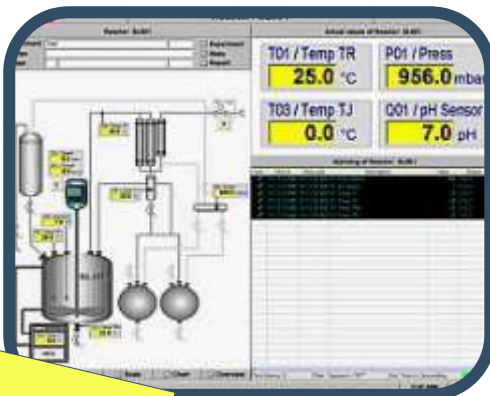

Noorderlaan 109
B-2030
Antwerp

www.autoclave.be

This English spoken seminar consists of 2 parts. Each part can be visited separately.

- Morning: Systag automation.
- Afternoon: Huber thermoregulation.

In between the parts you will have plenty of time to talk to the suppliers and other participants.

PROGRAM SEMI NAR

Systag lab automation

Presentation of:

- FlexyCUBE (parallel synthesis), + Huber petite fleur with up-to-date hardware and upgraded images and functionalities.
- FlexyALR (single reactor) + Huber Unistat 705 with newest software with drag and drop functionalities
- FlexyPlant + Huber Unistat 912 dummy

Place to be:
 Apollo Hotel Breda City
 Centre
 Stationsplein 14
 NL-4811 BB BREDA

Huber thermoregulation

Presentation of a number of case studies:

- Closed lab thermostats
- Closed thermostats for production
- Open bath thermostats

The case studies will be presented with Systag and Büchi equipment. We will elaborate on the process and the method, to show you the course of the temperature in both jacket and process as well as the setpoint.

See their website for 200 case studies !

Büchi process apparatus

Next apparatus of Büchi will be displayed on site:

- Flexyclave + Huber ministat 240 (open system)
- Minipilot + Huber Unistat 912 dummy
- Picoclave
- Midiclave
- Miniclave / tinyclave
